HARRY AND ROSEMARY WONG

The Well-Managed Classroom

"Behavior will rarely become a problem when effective teaching is already taking place." -Harry Wong

Rosemary and Harry Wong believe that you can **manage** a classroom but you cannot discipline one. The number one problem is not discipline but is a lack of **procedures and routines.** Procedures and routines play a key role in effective classroom management. A procedure is not a threat or a command. It's a consistent way to carry out tasks in the classroom. Establishing a set of procedures and routines builds a structured environment. When students understand how the classroom functions, there are fewer disruptions. Fewer disruptions mean more time for learning and academic progress.

3 Strategies:

1. Explain, Rehearse, and Reinforce: Teach the procedure by explaining it, practicing it, and reinforcing it throughout the year.

2. Importance of rules: Make sure students understand why rules are important and should be followed.

3. First Day is Vital: The first day sets the tone for the rest of the year so make sure that your classroom is prepared and students have guidance.

3 Examples:

1. On the first day of school, it is important that students know where to go, what to do, and how to do what they are supposed to be doing. The first couple of days of school is where you conduct most of your explaining and practicing.
2. Have assigned seats for students on the first day to minimize behavior problems.
3. Keep the rules posted clearly or have students have their own copy.
